We do not define ourselves as a band but more like a musical « collective ».  
Since 2011, all members of this project work to create their own music and this 12 tracks album is the result of this work.

A colorfull and rich creation, where voices are often used like samples. A love of music, of sharing, proximity and privacy with our public.

Missine+Tripstoic takes in charge to make you thrill and travel through a  
« TRIPOPROCK » (trip-hop, pop and rock) universe with many musical influences.  
This album, more than an end in itself, is the starting point of a long musical adventure with a second album already in preparation!
